SELECTED REFERENCES TO PUBLISHED RESEARCH ON HBOT

A small selected sample from more than 30,000 articles on this subject in the scientific literature

Hyperbaric Oxygen Therapy, General

Peripheral Vascular Occlusion, Circulatory Problems, Diabetes (Also see sections on Wound Healing and Infection below)

Natural History of Peripheral Vascular Disease without HBOT

**Stroke**

Other Central Nervous System and Sensory Problems

**Glaucoma**

Popova ZS, Kuz'minov OD: Treatment of primary open-angle glaucoma by the method of combined use of hyperbaric oxygenation and antioxidants. Vestn Oftalmol. 1996 Jan-Mar;112(1):4-6. [Article in Russian] (Stabilization of the visual function was attained in 80% patients)

**Multiple Sclerosis**

Wound Healing

Perrins J.D. Influence of hyperbaric oxygen on the survival of split skin grafts. Lancet

1969.

**Infections**

**Burns**

**Bone Disorders**

Kulagin L.M., Varguzina V.I., Kirsanove L.N., and others. Regenerative potentials of tissue under HBO conditions depending on the character of the injury. In Yefuni S.N.

Complications of Radiation Therapy

**Poisoning**

Trapp W.G. and Lepawsky M. 100% survival in five life-threatening acute cyanide poisoning victims treated by a therapeutic spectrum including hyperbaric oxygen. First European Congress Hyperbaric Medicine, Amsterdam, 7-9 September 1983.
